

# Rabbit<sup>®</sup> Corkscrew & Aerator

Lever Corkscrew with Red Wine Aerator, Foil Cutter & Extra Spiral

## Vertical Rabbit<sup>®</sup>

- Pulls a cork in 3 seconds flat
- Automatically ejects cork
- All-metal lever and gears
- Works on all bottle sizes and plastic corks

Pulling a cork with the Vertical Rabbit is as easy as 1-2-3!

Insert corkscrew

Pull cork

Eject cork

### DIRECTIONS:

- Before pulling cork, remove foil cap with separate foil cutter included. Place on top of wine bottle. Press two sides firmly against foil cap while turning bottle. (Drilling through foil caps can shorten the life of the spiral.)
- To operate: Raise lever handle and place corkscrew on bottle top. Push handle down to insert corkscrew. Squeeze bottom firmly and raise handle to remove cork. Push handle down and raise it to eject cork from spiral.
- Don't remove the cork manually from the spiral after pulling it. Always use the easy automatic cork removal.
- After hundreds of cork pulls, the Rabbit's spiral may need to be replaced. Raise lever handle and unscrew the round nut above the spiral. Remove the old spiral and insert new one.

**Five-Year Warranty:** If your Rabbit Corkscrew fails in normal use within 5 years, return it for repair or replacement, with proof of purchase to: Metrokane Inc. Att: Consumer Service. 205 Parr Blvd. Reno, NV 89512. Please enclose \$10 for shipping and handling.

## Rabbit<sup>®</sup> Red Wine Aerator

- Aerates red wine as you pour
- Improves flavor, enhances bouquet
- Screens out sediment

WINE EXPERTS AGREE: Aeration improves the flavor and bouquet of a newly opened bottle of red wine. Now, with the Rabbit Red Wine Aerator, you can aerate your wine right in the glass without a decanter. Simply place the Aerator on the glass and pour the wine through it. The improvement in taste and aroma will amaze you and your guests. The Rabbit Aerator also has a fine-mesh screen that removes any sediment in the wine. (Sediment may develop in fine red wines as they age but does not affect quality.)

### DIRECTIONS

Before first use: Wash in soapy water and rinse under faucet. Wash by hand after using, not in the dishwasher.

To aerate red wine: Place Rabbit Aerator on wine glass. Pour wine slowly through Aerator. This creates a wine shower of tiny droplets striking the sides of the glass and creating gentle aeration.
