to use**

Available for Cars, Trucks and Motorcycles.

RUSSELL™

Speed Bleeder™

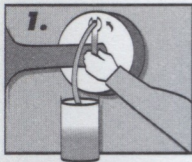

Revolutionary NEW Brake Bleeding System vastly simplifies a messy and tiresome task. Speed Bleeder™

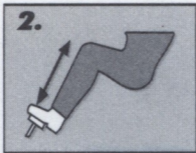

Just simply replace the stock bleeder screws in your present wheel cylinders with the NEW Russell Speed Bleeder Screw. Bleeding your brakes becomes a quicker and simpler task than ever before.

Easy Installation:

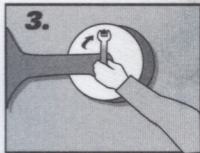

Position container to collect brake fluid. Remove your OEM bleeder screw and replace with the NEW Speed Bleeder

1. Open Russell Speed Bleeder screw $\frac{1}{4}$ to $\frac{1}{2}$ turn. Attach hose to catch can to collect brake fluid.

2. Pump brakes until air is purged from wheel cylinder. No need to close the screw between pumps as with a stock brake bleeder screw.

3. Close valve. Repeat previous steps for other wheels, adding brake fluid to master cylinder as needed to maintain level.
